

HD-203

Transparent Hydraulic Training System

The **HD-203** Transparent Hydraulic Training System is designed for understanding hydraulics system. The transparent hydraulic system gives a clear picture of how components work and demonstrate the functions. Transparent hydraulic training system includes fully operational models developed to show the hidden features of hydraulic components construction and operation.

The most important Standard Components

1	1x	Working table with drawers
2	1x	Hydraulic power pack
3	1x	Transparent oil storage tank in return line
4	1x	Transparent Distribution Block – P line (with pressure gauge)
5	1x	Transparent Distribution Block – T line
6	1x	Transparent Double-acting hydraulic cylinder
7	1x	Transparent Single-acting hydraulic cylinder
8	1x	Industrial Manual 4/3-way valve (A-B-T)
9	1x	Transparent 4/2-way single solenoid valve
10	1x	Transparent Pressure relief valve
11	2x	Industrial T-type connector
12	2x	Transparent T-type Connector with Pressure gauge
13	1x	Transparent Flow control valve
14	1x	Transparent One-way flow control valve
15	1x	Transparent Check valve
16	1x	Transparent External Gear Motor
17	1x	Transparent Rotary Vane Swivel Motor
18	1x	Transparent Rack & Pinion Motor
19	1x	Transparent Bladder Accumulator
20	1x	Transparent Piston Accumulator
21	1x	Transparent Pressure Switch
22	Hydraulic Hoses:	
	1x	0.3 m length
	4x	0.5 m length
	6x	0.8 m length
	2x	1.0 m length
	4x	1.2 m length
	2x	1.5 m length
